Dear all,

My name is Thomas Lea-Redmond and I am a 3rd year Computer Science undergraduate student. The purpose of this email is to considerately ask for your participation in a research project.
The study will consist of an in-person programming session in the Abacws labs. Participants will be given an individual Python programming assignment. Half of the participants will be given access to a Code Analysis tool designed to aid the production of higher quality code. Participants will have an hour to complete the assignment. Those who used the tool will be additionally asked to complete a short survey on the tools usability.

Participation in both is voluntary and anonymous, with the ability to opt-out whenever you feel you need to.

Participants in this study will be entered into a draw for one of two 25 GBP Amazon Vouchers.

If you are interested and you would like to find out more information, please reply to this email. Or if you would like to participate in this research study, please read the participant information sheet and fill out the consent form and send this back to me with your name and signature (Participation Information Sheet, and Consent Form are attached to the email).

Thanks,
Thomas
