

To install the application on an android device:

1. Install Android studio on your computer (make note of the path to "AndroidStudioProjects" folder where android projects are stored)
2. Unzip the android file submitted and drop this folder "diaryappv1" into the AndroidStudioProjects folder.
3. When opening Android studio import the application by using import and selecting the "diaryappv1" folder and select import.
4. Android studio will then build the project for you.

----make sure your android device is connected to your computer via a usb wire-----

5. when this is done click on the run application command, this can be done by clicking on the green play button or selecting run tab then run app.
6. This opens the adb, select your device and select run
7. This will install the application on your mobile device and open the application for you
8. You can close android studio and the application will remain on the phone
