

A photograph of three students sitting on the grass in front of a large, ornate building. The building has many windows and classical architectural features. The students are smiling and appear to be in conversation. The student on the left is seen from the back, the middle student is a young woman with long dark hair, and the student on the right is a young man with sunglasses and a purple t-shirt.

**Ethical rules and procedures at the
School of Computer Science & Informatics
Cardiff University**

Research under NHS ethics committee

- Patients and users of the NHS. This is intended to mean all potential research participants recruited by virtue of the patient or user's past or present treatment by, or use of, the NHS. It includes NHS patients treated under contracts with private sector institutions;
- Individuals identified as potential research participants because of their status as relatives or carers of patients and users of the NHS, as defined above;
- Access to data, organs or other bodily material of past and present NHS patients;
- Foetal material and IVF involving NHS patients;
- The recently dead in NHS premises;
- The use of, or potential access to, NHS premises or facilities;
- NHS staff recruited as research participants by virtue of their professional role.

If any of those applies, please contact resgov@cardiff.ac.uk

Non-NHS research

- Non-clinical research involving human participants or human material or human data (clinical research is referred to NHS ethics committees for approval).
- **Does not include research** where the information about human participants is publicly and lawfully available, e.g. information published in the census, population statistics published by government departments, personal letters, diaries etc. held in public libraries or on the open Internet.

Non-NHS research
